

AIRLIFT WINE TANK

Ready to Rumble Anytime. Anywhere.

Pneumatic Top Door

The AirLift Top Door is the newest lid designed and tested by JVNW's in-house engineering team and joins a vast and diverse product line of quality lid designs offered to the wine industry.

Developed to address the growing demand for safer, easy to open lids; the AirLift makes accessing the cap as simple as pressing a button.

One-person operation, the pneumatic control system runs on 40 PSI and allows for an adjustable rate of response for a smooth open and close operation.

TRUE 365 DAY TANK

The AirLift Top Door provides the access of an open top fermentation tank with the versatility of a closed top wine storage tank. Great for fermentation, storage, blending, and bottling.

BENEFITS

- The AirLift creates a tight seal using downward air pressure for increased sealing force. Hold down lugs optional to ensure additional sealing.
- Quick opening speeds provide instant and complete access to the cap.
- Safely open and swing-away 85 lb door with the touch of a button.
- Ergonomically designed.

Door lifts 3" off collar and swings to the side for full cap access, ideal for low-clearance. 110 volt, single phase control box.

Standard Sizes: 39" and 48" diameter tank opening.
